

A white and blue seaplane with the registration number N3397A and "ELEVAIR" on the side, floating on a body of water. In the background, many sailboats are anchored in a bay.

CARIBBEAN LUXURY ADVENTURE

AN ELEVAIR TOURS EXPERIENCE

EXCLUSIVE CURATED DAY TRIP

PRIVATE TOUR - GOURMET LUNCH

A luxury day-trip experience by seaplane for a tour of the world famous invitation-only Centro de Conservación o Rescate y Zoológico del Istmo located in Linton Bay. The tour is followed by a gourmet lunch with fine wines, then you can relax poolside or continue to explore the local area.

The facility is ranked in the top three of the world for tropical and exotic birds breeding centers. The private facility houses 500 species of animals and 3,000 animals at any one time. The Wildlife Rescue Center component has the unique know-how to rehabilitate Panama's endangered and at-risk species and birds. A unique and authentic experience that provides visitors with a new perspective on wildlife conservation.

The tour is followed by an opportunity to relax and enjoy a fine lunch with matched wines and spirits. Some guests may decide to continue the conversations with your hosts and enjoy the view, others may elect to continue the day with activities exploring the surrounding area or snorkeling. The choice is yours.

As the day winds up, we depart by your seaplane and you are back in Panama City in under 20 minutes.

Total Tour Time: 6 hours

Includes: Luxury seaplane charter, tour of the world-ranked private conservation and wildlife rescue center, gourmet lunch with fine wines, afternoon activities relaxing by the pool, kayaking or exploring the mangroves.

CENTRO DE CONSERVACIÓN O RESCATE Y ZOOLOGÍCO DEL ISTMO

The Isthmus Zoo, which is not open to the public, was founded in 1999 by the successful Peruvian-Panamanian businessman Jacobo Lacs, a self-taught ornithologist expert whose expertise and passion sustains this incredible sanctuary, home to more than 500 different species of birds.

Touring the facility is an enriching experience. The highlight is always the large enclosed aviary structures where numerous birds of different species coexist surrounded by plants, shrubs and other animals. Here you can see one of the largest collections of different varieties of toucans, many which were raised in the facility.

The zoo has also achieved the reproduction of several species of jaguars, ocelots, panthers, foxes, dingoes and multiple species of monkeys. Resting on a slope, there is an area destined to the preservation of frogs, many of them in the process of disappearing and that Jacobo also reproduces. A perfectly good harpy eagle that had been the victim of hunters hovers in a large cage.

About 20 employees and the support of a veterinarian are necessary to ensure that all these animals can live in conditions, well fed and in good health.
